# Sugar Corporate 6.5.0 Release Notes

## Overview

This document describes the changes in Sugar 6.5.0.

## Changes in Sugar 6.5.0

New features, enhancements, and other changes in Sugar 6.5.0 are as follows:

### User Interface Enhancements

New UI features in Sugar 6.5.0 are listed below:

- New navigation bar : Three navigation bars (Quick Create button, User Actions, and Module tabs) combined into one new navigation bar
- New collapsible footer : New collapsible footer displays Sugar logo and integrated applications
- Updated Actions menu : All Actions menu options in List Views and Detail Views collapsed into drop-down lists for a consistent look across the Sugar application

### Calendar Enhancements

The following enhancements have been added to Calendar in Sugar 6.5.0:

- Create recurring meetings and calls : Ability to create recurring meetings and calls using Quick Create forms in Calendar
- Sync recurring meetings and calls : Ability to sync recurring meetings and calls between Sugar and the plug-in software (Sugar Plug-in for Microsoft Outlook and Sugar Plug-in for Lotus Notes); meetings synced from the plug-ins to Sugar can be edited in the plug-ins only
- Change meeting and call duration by dragging : Ability to change the duration of a meeting or call by clicking on it and dragging
- Meeting end dates : Ability to create an end date for meetings
- Send meeting invites to new contacts and leads : Ability to create new contacts and leads at the time of sending meeting invites
- Email reminders for meetings : Ability to send meeting reminders via email

---

## Sugar Logic Enhancements

Sugar Logic enhancements in Sugar 6.5.0 are listed below:

- New UI for dependent drop-down fields
- Related module fields are displayed during related module formula creation
- Displayed fields are filtered based on the formula type

## Email Archive Enhancements

Email Archive enhancements in Sugar 6.5.0 are listed below:

- Ability to associate emails to cases based on case number
- All archived emails are displayed in the Archive folder of the Emails module
- Email archiving service is updated with URL instance changes
- Related Contact subpanel removed

## Sugar Mobile Plus Enhancements

Enhancements to Sugar Mobile Plus in Release 6.5.0 are listed below:

- Available LDAP support : LDAP single sign-on (SSO) is enabled
- Enhanced device licensing : Ability to use a single user license across different devices
- Multi-keyword search : Ability to use multiple keywords in a single search
- Automatic initial load support : Automatic initial load is enabled
- Bug fixes : Continued focus on resilience and stability; improved and stable Sync Server uptime

## Other Enhancements

Additional changes in Sugar 6.5.0 include, but are not limited to, the following:

- Full Text Search : Users can define the ability of full text searches, now available in custom modules and fields
- iCal integration : Calendar (meetings, calls, tasks) and Project modules sync with iCal as read-only records

- 
- Select and view Email Template Types : Ability to view all or filter Types of Email Templates in the Email Templates List View; filtered lists facilitate search and selection of Email Templates; only admin users can view Workflow templates

## Supported platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).

Note: Only IE8 mode is supported for IE8 support; IE7 or IE8 compatibility mode are not.

## New Issues in Sugar 6.5.0

For more information on a bug or to provide feedback, please use the [SugarCRM Bug Tracker](#).

- To view the complete list of bugs fixed in this specific release, run a search using 6.5.0 in the Targeted Release field.
- Look for the bugs marked Fixed in the Resolution field.
- To report a new issue found in this release, use 6.5.0 in the Found in Release field.
- Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

## Acknowledgments

SugarCRM would like to thank the following community members for their help in resolving issues in Release 6.5:

- Jeff Bickart, NEPO Systems, LLC
- Ray Gauss
- Yannick Biet, CAPTIVEA
