Sugar Corporate 6.5.3 Release Notes

Overview

This page describes enhancements to existing features, known and fixed issues, supported platforms, and acknowledgments for Sugar Corporate 6.5.3.

Feature enhancements in Sugar 6.5.3

- New In-app Tour Guide highlighting the new features of release 6.5.0
- Full Text Search (FTS) supports email addresses by default
- Ability for admins to select panels and/or tabs to display information in Edit View and Detail View pages of modules

Known issues

- Full system re-index for FTS â A full system re-index is required for existing FTS-enabled instances; existing data needs to be deleted during re-indexing

Fixed issues in Sugar 6.5.3

Due to the high volume of bugs fixed in Release 6.5.3, only bugs with escalations and High/UrgentPriorities have been listed below:

- 38801 : Related fields in custom modules do not save data for records created via Leads conversion
- 40573 : Day: Date Created in Reports does not convert to user's local time zone
- 45399 : Deleted Workflows are executed
- 46410 : Clicking Forgot Password link displays the Sugar Login page instead of the Change Password page
- 51482 : Email addresses entered in CC and BCC fields in Emails module disappear in the Draft stages of the message
- 52000 : Selected records do not display in the sub-panel of records with custom one-many relationship between the module and itself
- 52021 : Deleting Group Inbound Mailbox does not remove it from the Emails module
- 52994 : Using Quick Search to populate the user's relate field changes the

assigned user when adding a custom one-many relationship between Users and another module

- 54002 : Creating a custom module with Flex Relate field and relationship with Activities displays a database error
- 54003 : Emails in Inbox cannot be sorted by Date Sent order on MS SQL
- 54042 : Opportunities List View page loads very slowly if there are field dependencies within the Opportunities module
- 54231 : Access Control List (ACL) Roles are not respected in Mobile View
- 54393 : FTS incorrectly removes modules from search when ACL rules (via Roles) are applied on the List View of the module
- 54612 : Web to Lead Form created during Save Web to Lead Form is unable to display Chinese characters

For more information on a bug or to provide feedback, use the [SugarCRM Bug Tracker](#). To view the complete list of bugs fixed in this specific release, run a search using 6.5.3 in the Targeted Release field. Look for the bugs marked Fixed in the Resolution field.

To report a new issue found in this release, use 6.5.3 in the Found in Release field. Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

Supported platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).
