Hint 4.1.1 Release Notes

Overview

This document describes any new features, enhancements to existing features, fixed issues, and known issues for the 4.1.1 release of Hint. For information on supported platforms, please refer to the [Connectors Supported Platforms](#) page.

Features

The following features are included in this release of Hint:

- [Support for Sugar Fall '18 \(8.2.x\)](#): Hint 4.1.1 is supported for use with Sugar's Fall '18 release.

Known Issues

The following are known issues in this release of Hint. [Case Portal users](#) can use the following links for more details about each issue:

- [81059](#) : Hint adds fields to the record view for contacts in Sugar Portal that cannot be removed via Admin > Sugar Portal Editor.
- [80273](#) : Hint may overwrite user-populated fields during record creation. As a workaround, when creating new accounts, leads, and contacts, download any desired Hint data prior to populating other fields.

For more information on installing and activating the connector, please refer to the [Hint Installation Guide](#). For more information on using Hint, please refer to the [Hint User Guide](#).
